

# **Lean Enterprise Handbook For the Engineering Driven Business**

**Stephen C Armstrong**

**January 2004**

# Table of Contents

## Forward

## Lay Out Of The Book - Document Organization

People Teams and Partnership  
Supportive Cultural Environment  
Discipline Systems and Processes  
Customer/Competitor Operations Assessment

## PART I – Lean Philosophy

### 1.0 Introduction

Definition, Figure 1-1, Benefits  
Evolution, Transition Strategy, Basic guideline for transition  
Figure 1-2. Basic principles for structure  
Figure 1-3. Principles for implementation  
Figure 1-4. Preliminary production strategies

### 2.0 History of Lean

### 3.0 Lean Principles in Enterprise

### 4.0 Lean Performance Metrics

## PART II - The Human Side of Lean

### 5.0 The Importance of People and Culture

### 6.0 People-Teams and Partnerships

#### 6.1 Introduction

#### 6.2 Leadership Elements

#### 6.3 Teams

Team Concept  
Figure 6-1 Organization Charts  
Team Member responsibility  
Improvement Activities  
Daily Improvement activities

- Significant Innovation Activities
- Team Leaders
- Group Leader
- Roles of management
- Labor/Management Team

#### **6.4 Labor/Management Team**

#### **6.5 Responsive Supplier Relations**

- Supplier Integration
- Procurement Process
- Collaborative product design
- Selection of Preferred Suppliers
- Delivery Management
- Carrier Alliances
- Consolidation points
- Figure 6-2 Ideal Future State
- Delivery to point of use
- Improved Communications

### **7.0 Supportive Cultural Environment**

#### **7.1 Introduction - Why Culture Matters**

#### **7.2 The competitive edge- people**

- Figure 3-1 motivations for improvement
- Performance measure and improvement indicators
- Recognition of achievement
- Compensation

#### **7.3 Empowerment**

- Boundary definition
- Responsibility and accountability
- Continuous Improvement Techniques

#### **7.4 Trust**

#### **7.5 Employment stability**

- Career development process
- Counseling

#### **7.6 Education and Training**

- Principles
- Training and education support of continuous improvement
- Help employee manage change
- Team members are extensively involved in providing their own training
- Training focus
- Content
- Value, Attitude, and Awareness
- Train and Trainer
- Group process and leadership

- Technical Improvements
- Management Training
- Training metrical support
- Delivery strategy
- Delivery at team level by the team
- Evaluation of training effectiveness
- Logistics

### **7.7 Communication**

## **8.0 Organizational Structure**

- Transitional structure
- Organizing to support a process focus
- Process policies and management
- Basic principle for structure

# **PART III Disciplined Systems and Processes**

## **9.0 The Process Driven Enterprise**

### **9.1 Disciplined use of systems and processes**

- Custodial readiness
- Competitive benchmarking

### **9.2 Standardized work**

- Process Improvement Transfer

### **9.3 Elimination of Waste**

- Tracing to root causes
- Development of improvement plan
- Implementation of Improvements
- Documentation of Initial Improvement
- Monitoring of On-going Progress
- Results

## **10.0 Developing and Maintaining Process Quality Excellence**

## **11.0 Developing Continuous Flow of Information**

## **12.0 Developing Continuous Flow Of Material**

## **13.0 Managing Costs in a Process Driven Enterprise**

## **PART IV Applying Lean for Enterprise Integration**

### **14.0 IPD and Product Lifecycle Management**

### **15.0 Lean Enterprise Process Modeling**

### **16.0 Lean Engineering**

### **17.0 Customer/Competitor Operations Assessment**

#### **17.1 Summary**

- Customer buying factors
- Environmental trends
- Competitive operations assessment
- World class manufacturing study
- Future state link to strategy and marketplace summery
- Review memorandum
- Purpose
- Framework
- Figure 17-1 workflow strategic framework
- Link to strategic planning
- Strategic business objectives
- Figure 17-2 linkage to strategic business objectives

#### **17.2 Customer buying factors**

- Detailed finding
- Priorities
- Figure 17-3 Marketplace analysis
- Figure 17-4 program life cycle
- Environment trends
- Figure 17-5 summery-environmental trends
- Product technology/configuration
- Supportability
- Cost
- Manufacturing
- Management

#### **17.3 Competitive operations assessment**

- Detailed findings
- Figure 17-6 manufacturing/material systems and operations
- Competitive analysis

#### **17.4 Competitive operations assessment summery**

- Competitive strengths and weaknesses
- Figure 17-7 Summery of customer and competitive priorities

Figure 17-8 Competitive strengths and weaknesses  
Footnotes to figure 17-8  
Manufacturing capabilities  
Summary of competitive strengths and weakness  
Product technology/configuration  
Supportability  
Cost  
Manufacturing  
Management

**17.5 World class manufacturing study**

Detailed findings  
Figure 17-10 World class manufacturing survey

**PART IV Lean Transformation Roadmap**

**18.0 Building The Vision**

**19.0 Building and Inspiring the Change Agents**

**20.0 Disciplined Implementation**

**21.0 Sustaining the Lean Philosophy**
